The Village of Waterloo Clerk's Office is excited to announce approval of a new radio read water meter system!

What does this mean for you?

- Meter readings will be sent directly to the office through cellular signals with the touch of a button. This will lead to more accurate and more consistent readings.
- The metering system can be placed wherever a cellular signal can get through. For a majority of locations, this eliminates the need to have a device installed on the exterior of your home or business.
- An app will be available for you to monitor your usage and set notifications at specific limits.

A representative from **Wright Sewer and Water** will soon be reaching out (from a 712 area code) with information regarding installation of the new metering equipment. Most installations should be relatively quick. The plumber will notify you if any valves need to be replaced.

In order for this transition to go as smoothly as possible, we will need a few things from you:

- **Work with contractor regarding times to install new equipment,** when contacted.
- **Ensure a clear path to and around the meter**. The contractor will not move belongings to gain access and meters should never be enclosed behind drywall.
- If your contact information has changed, **update your account with the office.**

For any questions, please contact the office at mpruitt@waterloone.com or 402-779-2292
