Description ^

The Titan Attachments™ Hydraulic Truss Boom allows you to turn your skid steer into a high performance crane.

Details ^

Add versatility to your skid steer with the hydraulically operated truss boom. This truss boom allows you to use your skid steer as a crane or jib boom and move your items to a higher location or over fencing and railings. Easily lift your trusses or loads onto the top of structures or onto high trailers. The maneuvering ability of skid steers allow you to drive into hard to reach areas that typical cranes simply cannot go. This hydraulic truss boom is designed to connect to the skid steer style quick tach system that is also found on major tractor brands including Kubota, New Holland, Massey, Kioti and more. Simply connect the included feed and return hydraulic hoses to your third function valve, and you can easily extend the boom with the use of a lever inside the cab. There are two stages to the boom. The furthest section provides an additional extension of 42", or 84" and is secured using a heavy duty pin. The center extension is operated by the hydraulic system and offers an additional length of 89". The base of the truss boom measures 126" and is constructed with 4"x4"

UNIVERSAL SKID STEER CONNECTION: Our superior design allows this skid steer truss boom crane to fit with almost all skid steers, loaders, and tractors. This kind of versatility creates an opportunity for you to use it across various brands of tractors, such as the Ford 8n, 9n, Kubota, BX, Kioti, or John Deere tractors. This kind of connection is known as SSQA or Universal Skid steer style quick connect.

IDEAL FOR CONSTRUCTION COMPANIES: The hydraulic truss boom allows you to turn your skid steer into a mobile crane. Skid steers can easily allow you to move around your job site easier and into smaller areas that a full size crane might not be able to go.

DIMENSIONS: The overall length of the truss boom when fully retracted is 134". When the hydraulic truss boom crane is fully extended, it will reach 313", allowing you to reach high structures with ease. The middle hydraulic boom section, extends up to 99". The final boom extension is manually extended and provides two locking points at 42" or 84".

FEATURES:

- Fits Universal Skid Steer Style Quick Tach System.
- Hydraulic hoses and flat faced couplers included.
- Turn you skid steer or tractor into a boom truck crane.
- Powder coated steel to prevent rust and corrosion.
- Ideal for Construction Companies as well as Farm use.
- Easily lift Hay Bales, Feed, Trusses, Beams, Dry Wall Boards and more!

SPECIFICATIONS:

- Weight: 612 LB
- Fully Retracted Capacity: 850 LB
- Fully Extended Capacity: 350 LB
- Fully Retracted Length: 134"
- Fully Extended Length: 313"
- Hydraulic Piston: 3" Bore x 99" Stroke
